- Soft and conformable construction designed to integrate with the natural structure of the atrial septum
- Device design and material properties combine to optimize septal conformability and tissue ingrowth for short and long term performance

Confident closure

Gore ASSURED Clinical Study 6-month data

Clinicians at 20 sites enrolled 125 patients and experienced high technical success and 100% closure success rate at 6 months^{*,2}

Technical success rate ^{**2}	96% (120 / 125)
Closure success rate ^{*,2}	100% (112 / 112)

- No retro-aortic rim required — closure success with retro-aortic rim lengths of 0 to 27 mm (median of 4 mm)²
- 57% of patients had a deficient retro-aortic rim (< 5 mm)⁴
- Repositionable and retrievable technology helps ensure proper device positioning

100% closure success rate at 6 months^{*,2}
